## ALTON "Tonny" CALDERWOOD'S DIARY January 1 to December 31, 1938

transcribed by Elizabeth MacLean

Presented to me by Sal & Prudy at Christmas 1937, Many Thanks, Tonny

[from a undated newspaper clipping in the front of diary, along with a partially used pack of Lucky Strike Half and Half cigarette rolling papers]:

All in Order

The doctor was interviewing the last patient in the surgery when a woman rushed in crying: "Doctor! Doctor! Come quickly. My husband has swallowed a mouse!"

"Get back to him," said the doctor, "and try waving a piece of cheese about in front of his mouth. I'll follow you as soon as possible."

Five minutes later the doctor reached the house. A man was lying on a settee with his mouth open, while a hysterical woman was waving a fish about close to his face.

"You foolish woman," he cried. "I told you cheese."

"I know that," she shrilled, "but I've got to get the cat out first!"
